

Security Controls (1.1)

Technical controls -

- Controls implemented using systems
- operating system controls
- Firewalls, antivirus

Managerial controls -

- Administrative controls associated with security design and implementation
- security policies
- standard operating procedure.

Operational controls -

- control implemented by people instead of systems.
- security guards, awareness programs

Physical controls -

- limit physical access
- Crowd shack, fences, locks, badge reader.

T → Technical, M → Managerial, O → Operational
P → Physical

Date: / /

Control Types :-

Preventive -

- Block access to resource

- Prevent access

(T) - Firewall rules

(M) - Follow security policies

(P) - enable door locks

(O) - Guard check checks ID

Deterrent -

- Discourage an Intrusion attempt

- Does not directly prevent access.

(T) - splash screen

(M) - Demotion

(O) - Reception Desk

(P) - Warning Signs

(T) → Technical, (M) → managerial

(O) → operational, (P) → Physical

Date: / /

Detective -

— Identify and log an Intrusion attempt.

— may not prevent access.

(T) — system logs

(M) — Review login reports

(O) — Property patrols

(P) — Motion detectors

Corrective -

— Apply a control after an event has been detected to reverse the impact of event.

— continue operating with minimal downtime.

(T) — Backup Recovery

(M) — Policies for reporting issues

(O) — contact authorities

(P) — Fire extinguishers

Compensating -

- control using other means.
- Existing controls aren't sufficient.
- May be Temporary.

(T) - Block instead of patch

(M) - separation of duties

(O) - require multiple security staff

(P) - Power generator

Directive -

- Direct a subject towards security compliance.
- A relatively weak security control.

(T) - File storage policies

(M) - compliance policies

(O) - security policy training

(P) - Sign: authorised personnel only.
